

Bogus Chogm report is finally out.

Posted By Musa

The report was originally scheduled to be out last week but instead was delayed 3 times that very week, why?

It is rumored that the original unaltered report had included very big untouchable names, including the president's brother Salim Saleh, close friends like Sam Kutesa, Amama Mbabazi, Ameria Kyambadde, police chief Kale Kaihura, army Generals like Tinyefunza, Muhozi and Natasha the president's children not leaving out Janet Museven the president's wife.

With all these names involved in the chogm conspiracy ,it was inconceivable for any one even to think that a report indicting these criminals would be out under this regime. Finally the report came out omitting most names and the few that were mentioned were only blamed for embezzling very light sums of money, yet we know that the Chogm scandal was worth an estimate of £700m.

Shockingly the commission came up with approximately \$10m in questionable funds! Many intellectuals in Uganda and those around the world who had interest in this investigation wondered why the commission was even created in the first place! With a compromised report like that you would rather not come up with anything..

Does any one believe that Museven's hands are free of this scandal? No he is the architecture of this whole pyramid scheme and it widely known that over \$310m went to him alone excluding his wife and children, yet they also looted in hundreds of millions of dollars. Scapegoats like VP Bukenya were just used due to their stupidity and are paying heavily; poor man is only estimated to have snatched not over \$350,000 from the whole deal! Anyway read the report below
