

Ugandans to the rescue

July 15, 2010

Posted by Musa

Look closely this really inside of one Uganda's so called modern Hospitals built by M7. On the stretcher is a bomb victim. Can you imagine your relative on such a stretcher! That's the best M7 can do for us.

Just look at where the bomb victim's head is laid, with no pillow and no mattress. Again this is one of Uganda's best hospitals dictator M7 is proud of. Have ever wondered why he sends his family to Europe for treatment?

And you had that Ambulances filled the roads and sirens covered the city, is this what really the Ugandan government calls Ambulance? Do they even care about cross contamination? What if one of those patients is HIV? Any that's Uganda's best paramedics at work.

Now the paramedics are rushing patients to the Hospital. All dressed in white aprons and boots to display their skills. Is this the way you want your dear relative be taken to the hospital in an emergency? To the Supporters of M7 is this the best he can do in 25 years?

These are the paramedics and stretchers in Uganda's hospitals today. With dictator Museveni worth \$10B, his country has the world's worst health facilities.

What a mess this coward did.

Uganda was not prepared for this and will never be for as long as dictator Museveni is still in power. We must work together to uproot the entire evil empire this monster has built

Why did this happen? Do Ugandans really benefit in maintain security outside her borders? If you can't provide security to your own, how can you secure your distant neighbor,.

Don't even have paramedics, not Ambulances and certainly not health facilities, why interfere in a foreign policy that may cost you dearly, if that is true.
