

Ugandans to the rescue

10/19/2010

Do you as a Ugandan believe in your parliament?

At the current exchange rates Uganda's 300+ MPs, each earn over \$6,500 per month, making them the most lavishly paid in the world -- especially considering that Uganda's average per capita income is under \$300 **a year**, or \$25 per month. **Now do you ever wonder we have a do nothing parliament?** *With a buy out like this, that you call pay or salary, why would anybody even care to challenge the dictator?*

What was not mentioned/emphasized in the article is that the travel allowance include an amount for incidental expenses, which they do not have to account for or return if unused. A former MP told me that, for the Speaker of Parliament this comes to \$10,000 per day! Recall, this is in addition to other tax-payer paid per diem monies that cover hotel and food expenses. **To the spineless MPs, this is a whole lot of incentives that is worth your credibility.**

Still, these MPs ask for bribes from Museveni. For example, during the Constitutional change farce that lifted presidential term limits, the majority of MP accepted a \$2,000 bribe each to sell their vote. Of course they were bribed using our taxes and foreign taxes -- by way of foreign aid -- meant to build schools, hospitals, roads, etc. **So schools, Hospitals, Roads or any other developmental infrastructure were not built, but all greedy MPs were paid (BRIBED)**

Is there any willingness or hope of putting an end to these excesses?

No wonder they like to crush the events abroad, .since they demand \$500 dollars every night. My question is why aren't they buying kits to treat them jiggers. Based on the score card, most of them do not attend the hearings. Most of them never say anything in the parliament. Lie to Ugandans that they are fighting for their people, while the towns decay.

Do not trust these so called MPs to come to our rescue, these are the same crooks that are heavily benefiting from the dictator's loot. They only share less than 0.001% of his theft but to them it's a whole lot much compared to a nation, whose average house hold income is now \$25 per month! Given \$6500 a month bribe most can even sell their souls!!! Change shall come from us who are really feeling the heat, GUYS lets make it happen
