

Ugandans to the rescue

Tuesday, March 16, 2010

Posted by Musa

For many years we have witnessed the Museveni's government taking advantage of situations especially when it comes to natural disasters. First before the international community which always comes to the rescue of poor victims, especially in poor countries, Museveni has always been the first to position himself before the donors as a concerned president who wants all the aid to pass through his office in order to distribute evenly.

This is a lie because Museveni's government is known as the **world's most corrupt** in the entire world according to the United Nations watchdog. We all remember the Kasese earthquake which rumbled down almost the entire town's infrastructure, The Musevenies came out immediately and appealed to the donor nations for help which they got abundantly. Today we interviewed 63 people from that area and none claimed to have received a single reconstruction penny from this corrupt government.

These crooks have lobbied the international community on several occasions to loan them funds to, build schools, hospitals, roads etc. Today we all know that we still have children who attend class under the tree, we see terminally sick patients stranded on hospital floors and again we have all seen the corrugated roads in both the city and suburbs, yet these thieves continue to enrich themselves at the expense of the taxpayer. **Fact** . Museveni is the sixth world richest president with a net worth of \$10b but he is the so-called dear ruler of a country with the worst health system in the region! Just yesterday a 31-year-old died of food poisoning at Mulago hospital, what is so disappointing is the fact that the victim didn't die because the facility lacked the right treatment but just because he did not have shs/- 300,000 an equivalent of \$140.

Today they are asking for more money again to rip you off, when is this going to stop? It is our duty as concerned Ugandans to deny these crooks access to steal from us. Here is how much more they need the civilized world to give them [Shs35 billion needed to rebuild community](#)
