

Ugandans to the rescue

Tuesday, June 29, 2010

Posted by Musa

With so many illegal groups created by dictator Museveni one can only wonder, how in the world do Ugandans in Uganda live and survive today! For many years Ugandans have been subjected to unimaginable torture and murder by Museveni's **Central military intelligence (CMI)**. Which is notoriously known for kidnappings both within and outside Uganda?

As that wasn't enough, then came the **Internal security organization (ISO)** created by the same individual but under the command of his ruthless military General David tinyenvunza. Using torture and humiliating notorious chambers known as "Safe houses" located in various parts of the country especially kololo, many thought that they had seen enough of the dictator's wrath. But no..

More and more dangerous degrading, humiliating out of control hooligan groups have been formed by Museveni himself to simply to terrorize Ugandans. The militant "**Black Mamba**" responsible for illegal detentions and assassinations including harassing politicians like MPs who disagree with the dictator.

Today as the general elections are closing in, another brutal group has been enacted by his excellence president Yoweri Kaguta Museveni for the sole purpose of abusing any Ugandan who may wish to exercise his/her right to support and vote for the opposition. The new group in town is known as "**Kiboko Squad**" and there are a couple more groups now being planted in villages and other rural areas.

Below is the Kiboko squad agents ready to move in against the opposition rally.

Help is on the way
