You have all heard and many witnessed Museveni's so called Uganda people's defense force atrocities against humanity. Remember this photo when it was taken, the reporter who took this actual photo and published it and the victim herself were both interrogated by strong man Museveni, the fate of both is a mystery to all of us to this date.

The picture depicts actual Uganda Military officers humiliating this young girl by shaving her pubic hair with a military blade. According to some sources it is rumored that this act was done as a punishment to her for not revealing to them the rebel hide outs, others say she was shaved because one of the rapist wanted it "clean shaven" since the government strongly prohibited any body especially the press from talking or writing about this act of violation, it's difficult to know what really provoked this cowardly act. **All in all** UPDF is notoriously known for rape with no worrying about the consequences.

This is no re enactment but actual photograph taken live from the crime scene

Help is on the way
