## YOWERI MUSEVENI IS HIV POSITIVE!

Posted by Musa

Dictator Yoweri Museveni is to introduce a Bill that criminalise HIV exposure and transmission. Meanwhile, Janet Museveni knows the pain of being infected with HIV by a cheating husband. "Hiv/aids has continued to thrive because we have failed to protect ourselves and our children," Janet Museveni told women members of NAWOCA. "we have failed to exercise self control, say no to pre-marital sex and live faithfully in marriage as embodied in our cultures," she added.

The Government should not introduce laws that criminalise HIV exposure and transmission but laws that stand in the way of HIV prevention and treatment. Museveni has repeatedly heightened anxiety among health professionals by promising them a pay raise that has never materialised in years. The government, has been hesitant to compensate health workers who die on duty as per the Workers Compensation Act, 2000 while denying them life insurance provided under the 2006 Occupational Safety and Health Act. Fellow Ugandans, this time you'll have to forgive me for being too nosy. But for years I've been wondering why Uganda has become the HIV/AIDS success basket (Uganda

hospital have no drugs and are in a very sorry state)of the World?

Because my head has been buzzing with many questions such as: Was it because Uganda had more HIV infections? Was Uganda with the best research facility in the World to monitor HIV/AIDS for the rest of the world? Was Uganda the source of HIV? Was Uganda receiving state of the art medical facilities? etc.

To my disappointment, the answer was a Big NO and instead, Millions of dirty money recycled from Western criminal cartels was moving across uganda disguised as HIV/AIDS Funding.

However, I failed to understand why a president of a great nation such as ours that has produced first class revolutionaries like Kabalega, Okello Okello(Zanzibar rebel fighter), Idi Amin dada, etc. would go into the public domain and announce that his doctor was HIV Positive. Had dictator Museveni also become a doctator? If not, why would he lie to the nation? Maybe he had infected Besigye with HIV via some woman they once shared. How could he be sure? Ugandans, think about it!

Does the CIA know about Dictator Yoweri Museveni's HIV status and that's why they're using it (him) to commit genocide after genocide as-if he was possessed

with killing and now they're using their little secret as some sort of blackmail? Why is the Dictator's bitch (Janet Museveni) so obsessed with HIV/Aids, when she doesn't even give a damn to what happens to our Acholi Brothers, Sisters, Mothers, Daughters, Aunties, Uncles, elders, neighbors, etc. that are dying in concentrations camps? Why, Why? I keep asking myself?

The bill also criminalises – with a punishment of the death penalty – the intentional or wilful transmission of the virus. Dictator Yoweri Museveni has said he "fully supports" an HIV/AIDS law that would criminalise deliberate transmission of the virus. There has been a recent public outcry over media reports of HIV-positive individuals infecting minors, which has gained support for the bill.

I'm not a medical expert but I hear that, HIV medication makes people sleep on da Job and makes your cheeks swell – basically you look as if you have empanama (swelling of the testicles) in the face. Please help me understand this puzzle, can't figure it out because the other day, Kizza Besigye (the Dictator's Comrade and X-Physician) was boasting how he was a professional and that, he would never disclose nor compromise a patient's (Tibuhabwe Buzarirwa Museveni) medical details, mua...hahahaha! How many descent Ugandans has Dr Kizza Besigye treated (1985–200) apart from Criminals?

The bill could also allow the government to avoid its responsibility to prevent HIV, and foist the blame for being positive on infected people. Museveni should stop blaming the Army with statement like, "HIV/Aids is the greatest challenge the army faces. More UPDF soldiers have died from HIV/Aids than at the war front," as this shows how double faced he can be.

medication makes people sleep on da Job and makes your cheeks swell—basically you look as if you have empanama (swelling of the testicles) in the face.

Please help me understand this puzzle, can't figure it out because the other day, Kizza Besigye (the Dictator's Comrade and X-Physician) was boasting how he was a professional and that, he would never disclose nor compromise a patient's (Tibuhaburwa Buzariranwa Museveni) medical details, mua...hahahaha! How many descent Ugandans has Dr Kizza Besigye treated (1985–200) apart from Criminals?

The bill the dictator intends to push through, could also allow the government to avoid its responsibility to prevent HIV, and foist the blame for being positive on infected people. Museveni should stop blaming the Army with statement like, "HIV/Aids is the greatest challenge the army faces. More UPDF soldiers have died from HIV/Aids than at the war front," as this shows how double faced he can be.
